SIDDHARTH RADHAKRISHNAN

Phone: +91-9003234524 — Email: siddharthrkrish@gmail.com — LinkedIn: linkedin.com/in/siddharth-radhakrishnan

PROFESSIONAL SUMMARY

Results-driven Computer Science and Engineering student with a specialization in Internet of Things (IoT). Strong foundation in software development, artificial intelligence (AI), machine learning (ML), cybersecurity, and cloud computing. Skilled in developing and deploying full-stack applications, classification models, anomaly detection systems, and penetration testing. Passionate about building scalable, secure, and intelligent software systems across cloud and embedded environments.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, JavaScript, SQL, Bash
Machine Learning: PyTorch, TensorFlow, Scikit-learn, Computer Vision, NLP (Natural Language Processing), LLMs
Cybersecurity: Kali Linux, Ethical Hacking, Network Security, Penetration Testing, Threat Detection
Cloud/DevOps: AWS (EC2, Lambda, IoT Core, S3), Docker, Git, CI/CD, REST APIs, Firebase
Tools/Frameworks/Data Formats: React Native, OpenCV, Raspberry Pi, Linux, GitHub, JSON, XML, CSV, HTML

PROJECT EXPERIENCE

RULXAI - RUL with Explainable AI for Aircraft Engines *CSIR - NAL collaboration, 2025*
- Predictive maintenance system using LIME and CNN-BiLSTM
- Enabled aircraft maintenance engineers to identify fault prone engine components through explainable AI visualizations, improving trust and decision-making in predictive maintenance systems.
- Technologies: Python, Tkinter, CNN-BiLSTM, LIME, ML

AI-SOC Security Operations Center – AI/ML Engineer *NVIDIA Collaboration, 2024*
- Threat detection and response system using Large Language Models (LLMs) and anomaly detection algorithms
- Integrated security automation pipelines, reducing response time by 65%
- Technologies: Python, LLM APIs, SOC logs, JSON, RESTful APIs

Smart Attendance System – Capstone Project *AIOT Expo – 3rd Place Winner, 2023*
- Designed face recognition attendance solution with OpenCV + Raspberry Pi
- Deployed for real-time campus use with 95% accuracy.

CipherSnare – Cybersecurity Educational Tool *2023*
- Simulated ransomware behavior using AES-256 encryption and secure key exchange
- Used in cybersecurity awareness workshops and ethical hacking training

EXPERIENCE

Farmwise AI - Intern *Chennai, Sept 2025–Nov 2025*
- Code for content generator module.
- Used the content to make a platform for government students to study.
- Fixed bugs in the existing code.

Research Intern – CSIR–National Aerospace Laboratories *Bengaluru, Jun–Aug 2025*
- Created virtual scene generator with camera controls over geotiff terrain datasets
- Built JetAI web simulator with AI-driven stall/cruise/caution flight mode classifier
- Designed engine sound classification model and Predictive Maintenance system for aircraft engines with explainable AI (Paper Selected).

Co-Director – IoT Alliance Club, SRM University *Oct 2024–April 2025*
- Led 15-member dev team for AI and IoT R&D projects and hackathons
- Organized 5+ technical workshops on embedded systems and machine learning

Volunteer – Siragugal Charitable Trust NGO *Chennai, Jun–Jul 2024*
- Managed logistics, reporting, and event operations in a community development initiative
- Improved documentation and fundraising workflows through digital tools

App Developer Intern – CodSoft (Remote) *Mar–Apr 2024*
- Built and deployed 2 cross-platform mobile apps using React Native
- Implemented UI optimization and API integration, reducing load times by 40%

CERTIFICATIONS AND PAPERS

AWS AI/ML and IoT Core (2024) • Advanced Python for AI – SRM IST • AI in Cybersecurity – Coursera (2023)
• RULXAI - NCCM 2025 Conference (Research Paper)

ADDITIONAL PROJECTS

• **GLEP Therapy Robot:** Emotional response tracking companion bot • **COACONS Website:** Built event portal for SRM IoT club with real-time data • **Portfolio Web App:** Built and deployed personal site on Vercel using Next.js

EDUCATION

B.Tech in Computer Science and Engineering (IoT)
SRM Institute of Science and Technology, Chennai *2022–2026*
